Years of Research Keep Pentel Lead No. 1

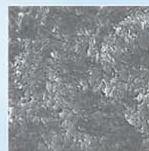

Writes up to two times longer per inch than competitors' lead

Made with ultra pure materials and smaller carbon and graphite particles for strength and smoother, darker writing without smudging

Consistent diameter makes lead stronger and makes it move smoothly through the pencil

Under the Microscope 0.5mm HB Lead on Paper, Mag 1000x

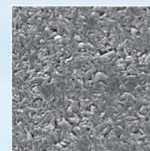

Pentel

Pentel:
Super Hi-Polymer®
Lead leaves a smooth
line and does not
damage paper.

Effortless writing
Reduced breakage
Less smudging

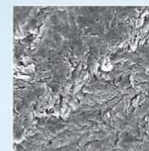

Brand A

Brand A:
Leaves uneven
graphite particles on
paper.

Rough, coarse feel
Greater breakage
Poor line quality

Brand B

Brand B:
Leaves large, irregular,
unevenly distributed
graphite particles on
paper.

Rough, scratchy feel
Very high breakage
Greater damage to
paper
